SHAREbusiness and SHAREconsultants

Knowledge, practical tools, learning and connected management

Understand the risks, prepare your arrangements, train people and check that controls work. Practical guidance, reusable resources and connected records support the whole process.

Knowledge for workplace decisions

Use SHAREknowledge for UK topic guidance, supervisor checks, escalation points and official sources. Find relevant courses, records and examples beside the topic you are reviewing.

Practical tools for the actual task

Use calculators and guided records for hand-arm vibration, noise, DSE and first-aid needs. Apply Five Whys and Fishbone analysis to test possible causes and keep a useful investigation record.

Documents and examples you can build on

Work with editable policies and procedures, blank records, checklists, audit forms and worked examples. Import existing documents or prepare new ones, then connect them to the business risks and arrangements.

Source-supported AI and editable drafts

Ask SHAREintelligence questions supported by released passages from the maintained SHARE knowledge database, with source links and scope checks. Prepare editable qualitative and 5 x 5 risk assessments, bowties, policies, toolbox talks and audit drafts for competent workplace review.

One connected record of the work

Company risks and legal duties link to arrangements and assessments. Issue a branded one-page briefing, assign relevant courses from the 100-course library and record practical competence, licences and renewals. Keep fire arrangements, permits, maintenance evidence and supporting files alongside reporting, assurance and verified actions. Use site KPIs and management reports to decide what needs attention.

Illustrative package costs - excluding VAT

An illustrative business with 250 employees across 6 sites pays £300 per month, or £3,600 over 12 months when paying monthly. That is £1.20 per employee per month for the specified package. All figures exclude VAT.

An illustrative consultancy with one lead consultant and 10 clients, each with up to 25 employees, pays £375 per month: £125 for consultant access plus £250 in client workspace fees. That is £4,500 over 12 months when paying monthly. VAT and professional consultancy service fees are separate.

Monthly AI and download allowances apply. Drafts need competent review against the actual work. Qualifications and separately listed specialist training have their own fees.

Bring one workplace activity or client review to a demonstration and see the process from risk to verified follow-up.

SHARE and Mitti (by SafetyCulture), Citation Atlas, HandsHQ

Published supplier information checked 23 November 2026. Capabilities and starting prices do not establish full package inclusion. Confirm means ask for a demonstration or quotation.

What you need to manage	SHAREbusiness / SHAREconsultants	Mitti (by SafetyCulture) Formerly SafetyCulture / iAuditor	Citation Atlas	HandsHQ
Published product focus	Connected safety management for businesses and consultant clients	Frontline operations, inspections and training	Safety software with consultant advice	RAMS production and training records
Knowledge Hub and practical workplace guidance	SHAREknowledge: UK topic guidance, supervisor checks, escalation points and official references	Workplace topic guides, templates and learning resources	Employer guides, templates and 24/7 safety advice	Construction guidance and RAMS content library
Practical calculators, assessment and investigation tools	HAVS, noise, DSE, first-aid needs, Five Whys and Fishbone tools	Inspection calculators, formulas and investigations; confirm specialist scope	Risk builder and RIDDOR guidance; confirm specialist calculators	RAMS/COSHH builder and toolbox talks; confirm wider tools
Downloadable records, templates and worked examples	Editable policies, procedures, blank records, checklists, audits and worked examples; allowances apply	Editable library templates and PDF inspection records	Risk/policy templates, checklists and PDF records	Free RAMS/policy templates, examples and assessment PDFs
Maintained source database, traceability and jurisdiction controls	Released SHARE knowledge passages, source links and jurisdiction checks; guidance gaps remain explicit	Author-labelled resources; confirm UK source review and nation controls	Legislation monitoring; confirm source citations and nation controls	Reviewed RAMS content; confirm source links and nation controls
Company and site risks	SHARErisk register, linked arrangements and site-specific additions	Risk and inspection templates; confirm enduring register	Risk assessments and review reminders	RAMS; register on selected plans
Policies and document control	SHAREms, owners, revisions, imported files and risk links	Versioned documents linked to sites and work	Policy support and central documents	RAMS library and attachments
Staff reading and acknowledgement	Branded one-page facts, versioned reading tasks and sign-off	Version acknowledgements through training and Heads Up	Signatures and timestamps	Version-controlled RAMS signatures

What you need to manage	SHAREbusiness / SHAREconsultants	Mitti (by SafetyCulture) Formerly SafetyCulture / iAuditor	Citation Atlas	HandsHQ
Workforce e-learning	All 100 courses included for every business and consultant client workforce. More added over the coming weeks.	Training platform and course library; confirm catalogue	150+ courses advertised	150+ iHasco courses; purchased credits
Training and practical competence	SHARECompetence matrices, practical sign-offs, licences and renewals	Training and credential records	Training gaps and expiry tracking	Training Register, evidence and renewals
Incidents, near misses and investigation	SHAREreporting, risk links, investigation, actions and verification	Issues, investigations and actions	Incident records and RIDDOR guidance	Confirm wider incident workflow
Checks, audits and corrective actions	SHAREassurance, risk-based schedules, owners and verified evidence	Mobile inspections, schedules and actions	Site findings and assigned tasks	Confirm wider audit scheduling
Fire risk management	SHAREfire, site duties, assessments, checks and actions	Fire check templates; confirm duty-holder workflow	Fire services; confirm package	Confirm dedicated fire management
Permit to work	SHAREptw, isolations, approvals and handback	Permit workflows advertised; confirm package	Confirm	Confirm
AI assistance and its scope	SHAREintelligence answers from released SHARE database passages, with source links and editable document drafts. Competent review required.	AI Assistant across operational records and documents	Confirm current AI scope	Free AI toolbox-talk generator
Maintenance, certificates and evidence	Other information, maintenance records, owners and due dates	Assets, maintenance tasks and files	Equipment checks and servicing reminders	Training certificates and RAMS attachments
Dashboards and management reports	Site KPIs, leading/lagging indicators, reports and consultant priorities	Analytics and site benchmarking; plan-dependent	Site priorities and trends	RAMS analytics and training reports

Setup and ongoing support	Three setup hours included. Optional support £495/day excluding VAT.	Services and integrations by quotation	Help guides and email support
Published subscription basis	Business from £100/month . Consultancy £125/month , extra consultants £20/month , plus each client from £25/month . Excludes VAT.	Quote by workforce, sites, modules and implementation.	Company from £119/month + VAT . Consultancy wholesale quote; add-ons vary.
Important buying check	Specified offer and current local trial build. Hosted release acceptance remains outstanding.	Check Professional/Enterprise configuration and learning content.	Published terms list contracting entity as pending; confirm readiness.

Scope, limitations and supplier sources

Supplier pages checked on 23 November 2026 . This is a comparison of published capabilities, not a hands-on test or a claim that every feature is included in the starting price. Confirm means public information does not establish the exact workflow or package inclusion; it does not mean the feature is absent.

Mitti is the current name of SafetyCulture, formerly iAuditor. Several alternatives also connect workflows and use AI. Course libraries, user licences, advice services and consultancy access differ, so headline prices are not equivalent quotes.

The four guidance and resource rows include public libraries as well as software features. Public availability does not establish inclusion in a paid plan. Specialist calculators, legal databases and AI knowledge sources differ in scope.

SHARE status: the SHARE column describes the specified package and current local trial build. Hosted release acceptance remains outstanding. All 100 courses are included for each business and each consultant client's workforce, with more being added over the coming weeks.

Use the comparison as a shortlist. Ask suppliers to demonstrate onboarding, a revised procedure, a training assignment, an incident and action close-out for one of your sites. Confirm permissions, data export, implementation, renewals and the full contract cost before choosing.

Sources are suppliers’ own public pages. This comparison has not tested competitors’ products. It gives no guarantee of availability, implementation readiness or package inclusion. No quantified time saving has been independently measured.
